# Empower Youth Foundation

Changing Lives Through  
the Science of Learning

# About Us

We recognize that accessible and effective education is crucial. Success in the classroom requires hard work, dedication, and the right support. Too often, learners find themselves lost in generic classroom settings, struggling to stay engaged. We understand this, and we offer the solution.

The aim of the Empower Youth Foundation is to give underprivileged students the educational opportunities that would not otherwise be available to them. For some families extra educational opportunities can be costly, as a result a family's financial situation can make providing essentials difficult and affording additional educational activities impossible. Our initiatives are aimed to identify areas within a community needing assistance and look at how Empower Youth can ease the burden on families to ensure that all children are being afforded the same opportunities that allow for young minds to development and thrive.

## Our Model

Empower Youth Foundation changes lives through the science of learning using a teaching model developed by Fit Learning. The Fit Learning model has improved the cognitive and academic skills of thousands of learners worldwide and produces 1-2 years worth of growth in 40 hours of instruction.
